

MEP DESIGN-BUILD ENGINEERING

THE NEXT GENERATION OF MECHANICAL, ELECTRICAL AND PLUMBING SERVICES

The facilities industry is undergoing a major transformation. With the increased accessibility of data and technology, you need a project team that can adapt to advanced building systems, changing workflows, and process efficiencies that will extend the life cycle of your facility for years to come.

Whether you're looking to work with an MEP engineer to assist with HVAC system planning, plumbing installation, or to provide a building automation solution to optimize and simplify operations, you need a contractor you can trust.

At Kroeschell, we deliver complete mechanical, electrical, and plumbing design-build engineering and construction services. We built our legacy on providing quality craftsmanship to facility customers across the country, helping them to achieve superior results with optimal building performance.

Our highly-trained design-build engineering and construction team is professional and reliable. They go above and beyond to perform work at the highest standard to complete projects with an eye on your bottom line. When you choose Kroeschell, you gain a partner that will streamline any construction initiative and ensure your design-build project stays cost-effective — and ahead of the curve.

Kroeschell Engineering is your partner in creating and maintaining sustainable and operationally optimized building systems.

- Design/build MEP Solutions
- Federal MEP Solutions
- Electrical Systems
- Mechanical HVAC Systems
- Lighting Controls
- Commissioning Services
- Plumbing Systems
- Energy Services
- Co-generation Plant Systems
- General Contracting
- Industrial Piping Systems
- Process Piping Systems
- Process Steam Condensate Systems
- High-purity Sanitary Water Systems

A DIVERSE RANGE OF **MEP DESIGN-BUILD SOLUTIONS**

DESIGN/BUILD SOLUTIONS

We make it easier to take on major projects with design/build. From beginning to end, Kroeschell handles your construction project. With one partner, you get an optimized workflow from concept to completion.

MECHANICAL HVAC SYSTEMS

We've helped organizations achieve energy efficiency with our leading Mechanical HVAC Systems services. Our team is highly-trained in providing systems evaluations and upgrades to chiller and boiler systems, hydronic heating systems, steam systems, and more.

ELECTRICAL SYSTEMS

Kroeschell can assist with designing and installing electrical floor plans for lighting, power, communications, and fire safety systems, as well as providing electrical equipment, lighting fixtures, and panel board scheduling.

PLUMBING SYSTEMS

When plumbing systems fall into disrepair, it can threaten the integrity of your building — and damage prime assets. Kroeschell is skilled in plumbing systems design, drain cleaning, sewer rodding, and water and energy efficiency evaluations and upgrades.

LIGHTING CONTROLS

Kroeschell's dedication to reliable and advanced light control systems have produced innovative and effective solutions.

COMMISSIONING SERVICES

Kroeschell's commissioning process is designed to achieve, verify, and document the performance of your facilities, systems, and assemblies meets defined objectives.

BUILDING AUTOMATION SYSTEMS

Gain greater control over systems. Kroeschell will design, install, service, monitor and maintain your building automation systems to help you increase energy efficiency, improve maintenance times, and lower operational costs.

ENERGY SERVICES

Energy costs remain one of the biggest expenses in facility operations. Kroeschell's experts can help customers better understand today's cost and energy-saving options.

CO-GENERATION PLANT SYSTEMS

Kroeschell provides turnkey installation of co-generation systems in convenient sizes for a variety of applications to help your organization replace aging infrastructure, reduce energy waste and enhance operational efficiency overall.

GENERAL CONTRACTING

Kroeschell has the ability to assemble an expert team of field supervisors and subcontractors to take your construction project from start to finish. We provide hands-on construction, project management, and development services.

INDUSTRIAL PIPING SYSTEMS

Kroeschell has experience installing a variety of pipe materials including various grades of carbon steel and stainless steel, copper, and pharmaceutical grade plastic piping.

PROCESS PIPING SYSTEMS

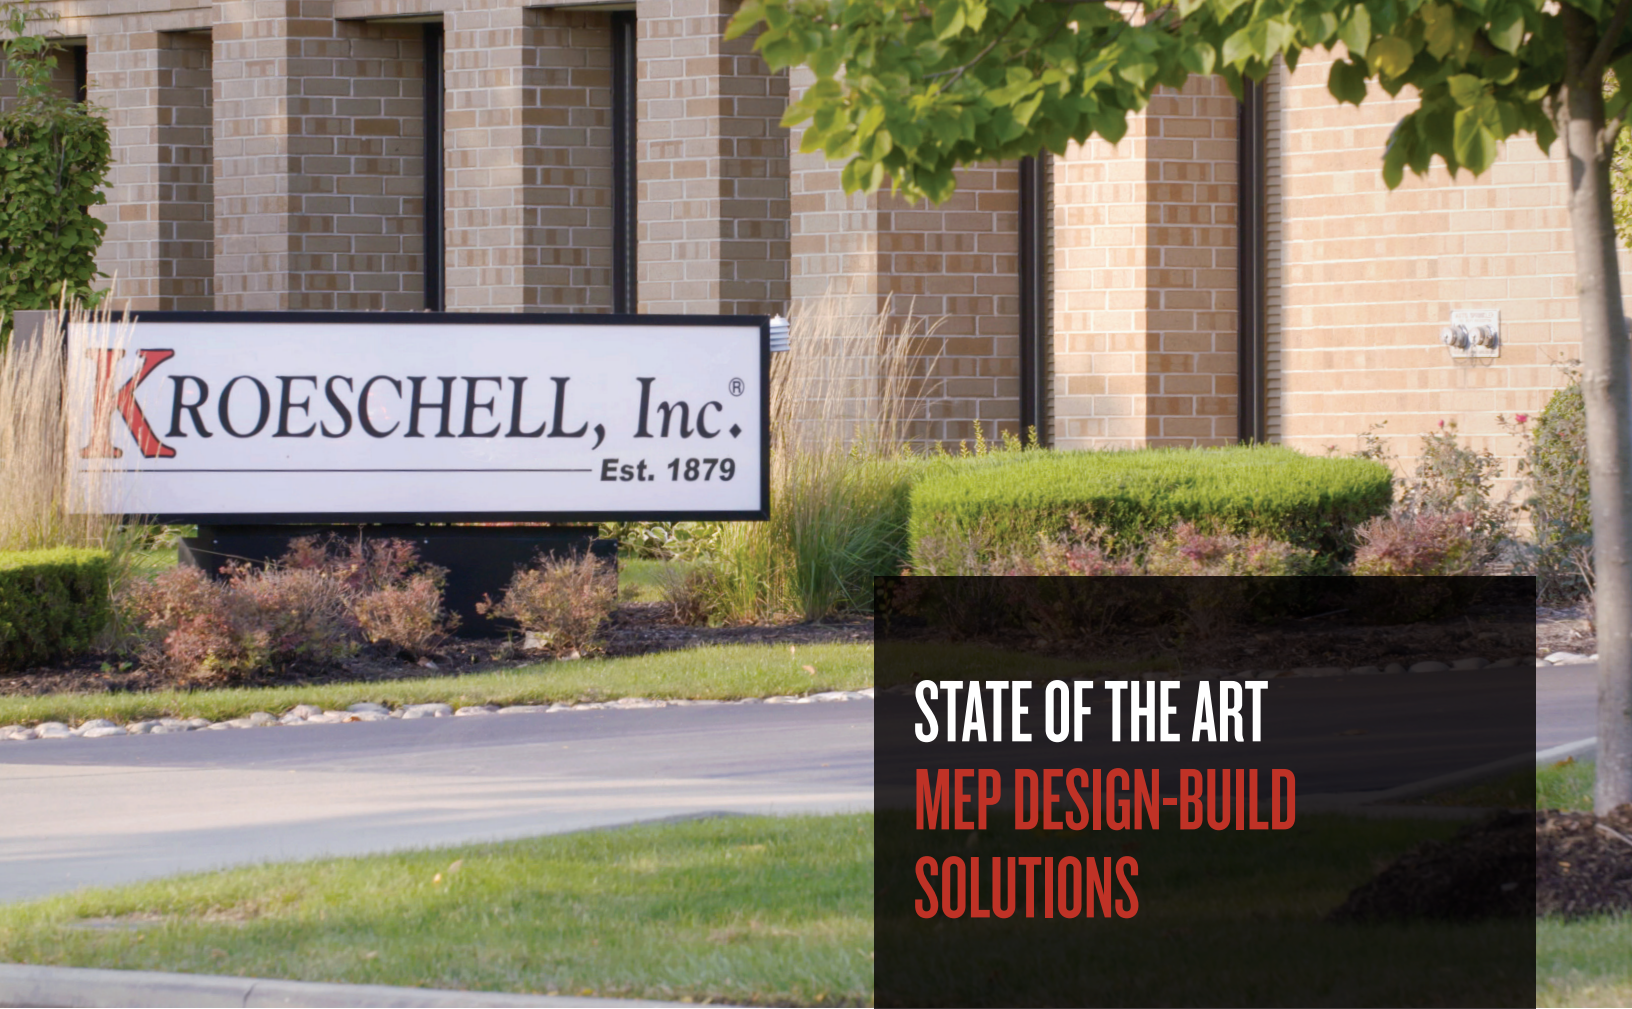

Our expert team is available to handle a variety of piping applications including those used in pharmaceutical and food processing systems.

PROCESS STEAM & CONDENSATE SYSTEMS

We offer customized solutions for your steam and condensate network that will make efficient use of energy.

HIGH PURITY SANITARY WATER SYSTEMS

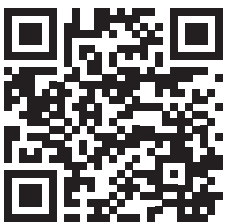

You have high standards for your water, and so do we. For healthcare, labs, and industrial institutions, we design your high-purity water systems to keep your water safe from contaminants.
